Catherine Thimmesh is the author of "Lucy Long Ago: Uncovering the Mystery of Where We Came From." This fascinating and illustrated book contains computer generated images of an ape with some very human like features, named Lucy, whose bones were discovered in Ethiopia in 1974. Thimmesh describes the process of recovering the bones, interpreting them and also discusses their importance in discovering who humans are and where we came from. The book has been named a finalist for the 2010 Minnesota Book Awards in the **Young People's Literature** category.

This program is funded in part or in whole with money from the vote of the people of Minnesota Nov. 4, 2008, which dedicated funding to preserve Minnesota's arts and cultural heritage.
