STILLWATERRD-75TH**

Reconstruction of Stillwater Road/75th Street (also known as County Highway 12) will begin in Spring of 2019. Work will include intersection and roadway improvements between Highway 244 and East Avenue.

While advancing project plans, the design team determined that Stillwater Road must be closed to traffic during construction. Road closures will occur in segments as construction crews make improvements. Signed detour routes will maintain access to the businesses and residences as safely as feasible during construction. Anticipated detours will be posted on the project website.

Prior to construction, there will be an opportunity to meet the project representatives to discuss specific needs and concerns. A public open house will be held in Spring of 2019. Open house invitations will be mailed and posted on the project website. To receive future project updates and notices by email, visit the project website and sign up!
