What is the County Road 5 Design Study? →

What is the design study about?

County Road 5 is an important north-south link in the City of Stillwater. However, it currently lacks adequate pedestrian and bicycle accommodations and connectivity among facilities. The study will look at ways to improve facilities and connections for pedestrians and bicyclists, as well as improving both safety and mobility for motorists on this 2.5-mile corridor. The project will focus on four different segments:

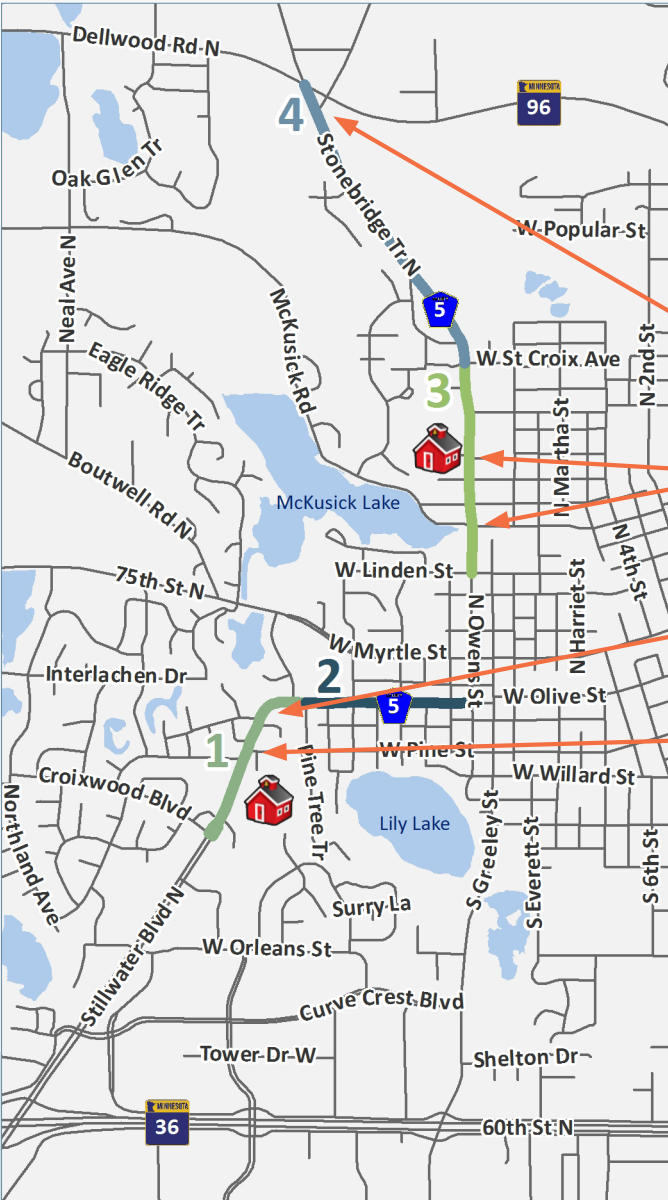

SEGMENT 1: Croixwood Boulevard to Pine Tree Trail

SEGMENT 2: Pine Tree Trail to Owens Street

SEGMENT 3: Linden Street to St. Croix Avenue

SEGMENT 4: St. Croix Avenue to TH 96

Note: Olive Street to Linden Street is not part of this study

The study will evaluate various options for each segment, but some specific goals of the project include:

- Develop and evaluate concept designs for pedestrian and bicycle connections between County Road 5, adjacent neighborhoods, and the new Browns Creek Trail.
- Improve pedestrian crossing operations and safety across County Road 5 at McKusick Road (County Road 64), where a heavily used trail intersects County Road 5, and at Elm Street near Stonebridge Elementary School.
- Provide a separated pedestrian facility (sidewalk or multi-use trail) on one or both sides within the County Road 5 corridor between Dundee Place and Deer Path.
- Improve pedestrian crossing operations and safety across and along County Road 5 in the vicinity of Pine Street, near Lily Lake Elementary School.

The outcome of the study will be a plan for future safety improvements and facilities through the corridor, some of which could be constructed in 2014.

We are looking for your input.

PUBLIC OPEN HOUSE

Tuesday, March 11, 2014

5:00 to 7:00 p.m. *(come & go)*

Stillwater Public Library (224 Third Street North)

Margaret Rivers Room

2014 PROJECT SCHEDULE

JAN	FEB	MAR	APR	MAY	JUNE	JULY
	Concept Development February-April					
		OPEN HOUSE		OPEN HOUSE		
			Development of a Preferred Alternative			

A public open house will be held to:

- Introduce the project purpose, schedule, and known issues
- Gather input from the community on existing issues and concerns with any potential solutions

Can't make it?
