

County Road 57 (Keller Ave N/Keystone Ave N) Resurfacing Project

Project Details

Project Scope

Washington County Public Works has hired a contractor to resurface County Road 57 (Keller Ave N/Keystone Ave N) from County Highway 7 (122nd St N) to approximately 0.7 miles north of Lynch Rd N. This project is expected to start in July and is anticipated to be completed in one construction season.

This project will include:

- Resurfacing the roadway
- Replacing a number of culverts under the road and driveways
- Replacing roadway signs and pavement markings/paint

Working Hours

Normal working hours for this project will be Monday through Saturday from 7:00 AM to 7:00 PM. No work will be allowed on Sundays or holiday weekends.

Trash/Recycling Pickup

The Contractor will coordinate location for trash/recycling pick-up adjacent to the active work zone and the Contractor will be responsible to transport the trash/recycling receptacles to and from the pick-up area on the days of scheduled pick-up.

Driveway Culvert Replacements

There are a number of culverts under the road and various driveways that will be replaced as part of this project. During driveway culvert replacement, vehicle access to driveways will be impacted. The contractor will notify the property owner a minimum of 2-days prior to closing vehicle access.

Traffic Control

County Road 57 within the project limits will be open to traffic for the majority of the project; however, traffic may be restricted to one-way travel at times. During these restrictions, flaggers will be used to stop traffic in one-direction while the other direction of traffic clears the work zone. Be advised of construction and truck traffic, and expect congestion and traffic delays.

The road culvert work will require a **full closure of County Road 57** within the project limits. This work is anticipated to occur within a two-week timeframe and will utilize a “rolling closure” as the contractor progresses work. A combination of on-site signage, website, social media, and website updates will be utilized to communicate the closure location and respective detour route during this two-week window.

Refer to the “**Road Closure & Detour Details**” handout for more information.

Turf Establishment

Seed will be placed for turf establishment where necessary along the project limits. This seed is placed and then left to nature to establish. If you, as the property owner, currently maintain the County’s right-of-way the same as your yard, we recommended that you water these restored areas and minimize mowing until the seed has completely established.

Mailboxes

If you have a mailbox on County Road 57, your mailbox post will be replaced with a swing-away type post at no cost to you as part of the project. See the attached mailbox document for additional details. Your existing mailbox will be attached to the new post. The swing-away post facilitates snow removal and provides improved safety should an errant vehicle collide with it. **If you wish to decline the swing-away mailbox post replacement, please contact Jeff Frahm at jfracm@wsbeng.com or at 612-209-6961 by Friday, June 30, 2023.**
