

Appendix A – Self-Evaluation Results

Data collection for the Washington County Self-Evaluation occurred in 2014 and was performed by a group of summer interns in coordination with County staff and Americans with Disabilities Act (ADA) vendor / consultant. Data for interior accessible elements was documented using available ADA checklists. Data for exterior accessible elements was documented on custom checklists incorporated into the Washington County GIS system via iPad technology. A field manual for the custom checklists was created to assist in the entry of the inventory data and can be found in Appendix F.
